

HOSPITAL HEADWALLS

There's a better way to design amazing headwalls.

Why are traditional, and even modern modular headwalls so basic, and yet so expensive? Wrapped in a durable, cleanable solid surface skin, Shield's premanufactured, modular headwall systems meet mission-critical needs of modern healthcare environments.

Better materials, proprietary construction

Shield headwalls are designed with versatility and simplicity in mind. From the customizable panel system to the integrated med gas arrangement, we've refined our system down to a science.

Premanufactured, modular design

Control quality, consistency, budget and timeline with design-centric manufacturing. With architects on staff, we get it. Let our design team help detail your vision into reality.

“Functional and durable is nowadays a given. Partnering with **SHIELD HELPED US CREATE A ONE-OF-A KIND DESIGN** for a very special client intensely focused on elevating the patient experience.”

- Carlos Amato, AIA, ACHA, EDAC, LEED AP
Principal, CannonDesign
